

DECARBONISING GAS THROUGH INNOVATION

ONE MISSION. MULTIPLE SOLUTIONS.

About Us

We are an innovator as well as a technology and service provider to the gas sector with a mission to enable and accelerate the decarbonisation of energy needs globally. Our team has decades of experience in bringing novel solutions to a range of gas industry problems, and as well as developing our own products we ensure we partner with leading edge innovative organisations to design turnkey projects.

Our Mission

Our mission is to develop technology that supports the energy transition in the UK. This enables us to help reduce greenhouse gas emissions and increase the integration of renewable sources, such as biomethane and green hydrogen into the grid system. By doing so, we aim to deliver a more resilient network and drive decarbonisation. The legally binding Net Zero targets in the UK by 2050 pose challenges to both the current billing system and the existing infrastructure and instrumentation. Bohr is committed to improving low-cost, simple-to-install-and-operate, low/zero emission technologies to enhance network resilience, performance, and safety.

What We Bring

- ✓ Products
- ✓ Service
- ✓ Data Platform
- ✓ Technology/ Innovation
- ✓ Specialists and Consultants
- ✓ Solutions and Systems

Sampling and Analysis

Trace measurements/ Sample Probes
LNG Sampling/ Analysis Advisory to O&G

Biomethane and Natural Gas

Gas Network metering/ Gas quality analysis
Pressure & flow control/ Odourisation/
Grid Entry Units/ Propane Reduction

Hydrogen

Injection & blending/ Analysis integrated in
flow meters/ Control valves

Emission Reduction

Leak Management/ Environmental Monitoring/
Plant/process monitoring/ Carbon Dioxide
(CO₂) Analysis & Certification

Digitalisation and IoT

Telemetry, IoT, Digitalisation/ SCADA / DCS
Integration/ Cloud based remote monitoring/
Custom telemetry systems

Optimisation and Machine Learning

Operational Consultancy/ Automated
optimisation/ Predictive maintenance
