

Succeeding in a lower carbon future

AvantiGas BioLPG

INTERESTED IN BIOLPG FOR YOUR BUSINESS? REDUCE EMISSIONS WITH A CUSTOM BIOLPG BLEND

THE GREENER CHOICE

Renewable Liquid Gas (rLG) can significantly reduce your carbon footprint. Find out more about the role that rLG is playing in the path to a greener future at avantigas.com/essentia.

THE COMPLIANT CHOICE

We offer a certified solution (under the ISCC certification scheme) – to ensure we comply with public directives and regulations. Certificates can be issued upon request.

THE CONVENIENT CHOICE

Make the switch now. Scale up when you are ready. Transitioning to renewable liquid gas requires no adjustments to your existing installation. You can start your journey immediately to BioLPG with a blend of your choice. The higher blend – the lower carbon emissions.

THE RELIABLE CHOICE

BioLPG comes with the same reliability and provides all the benefits of conventional LPG.

MEETING THE DECARBONISATION CHALLENGE WITH BIOLPG

WHAT IS BIOLPG?

BioLPG is a renewable Liquid Gas (rLG) produced from renewable sources.

HOW DOES AVANTIGAS BIOLPG WORK?

This is a drop-in fuel delivered on a mass balance basis. Renewable liquid gases need no new infrastructure – and will require no changes or investments to your existing installation. It is a seamless transition.

'BioLPG, alternatively known as biopropane, is a versatile, 'drop-in' renewable solution which can provide up to 90% emissions reduction.'
